

Overview for Families

ABOUT COR ADVANTAGE®

Proven valid and reliable by HighScope Educational Research Foundation, COR Advantage is an observation-based early childhood assessment for children from birth to age six. This strengths-based assessment focuses on what your child is able to do, as demonstrated during daily activities rather than performance on tests.

WHY YOUR SCHOOL USES COR ADVANTAGE

Your school uses COR Advantage online system to collect and organize observations. Teachers and school teams can then use these observations to analyze and track learning trends, build developmental portfolios, and create individually tailored lesson plans. Sent to you regularly via text message or email, this digital documentation gives you a unique window into your child's school life.

WHAT YOU WILL RECEIVE

You might receive pictures, videos, messages, and even dynamic newsletter updates from your child's school. This information may be annotated by the teacher and can be sent to you via email or text message. In addition, there you can also download the free companion app, Kaymbu for Families, on your mobile device to receive updates from your programs in a more streamlined way!

PRIVACY AND SECURITY

Privacy and security is a mission-critical requirement for the COR Advantage system. COR Advantage serves thousands of early education programs, and there is nothing the team takes more seriously than the security of the data and media COR Advantage manages. You can find additional privacy and security information at <https://coradvantage.com/privacy-policy/>
